AWS HEALTH DASHBOARD

The AWS Health Dashboard is the single place to learn about the availability and   operations of AWS services. You can view the overall status of AWS services, and you can sign in to view personalized communications

The service history – Here we have some updates of services status, "The green" tick mark indicates the services are operating normally and there are no issues occurring.

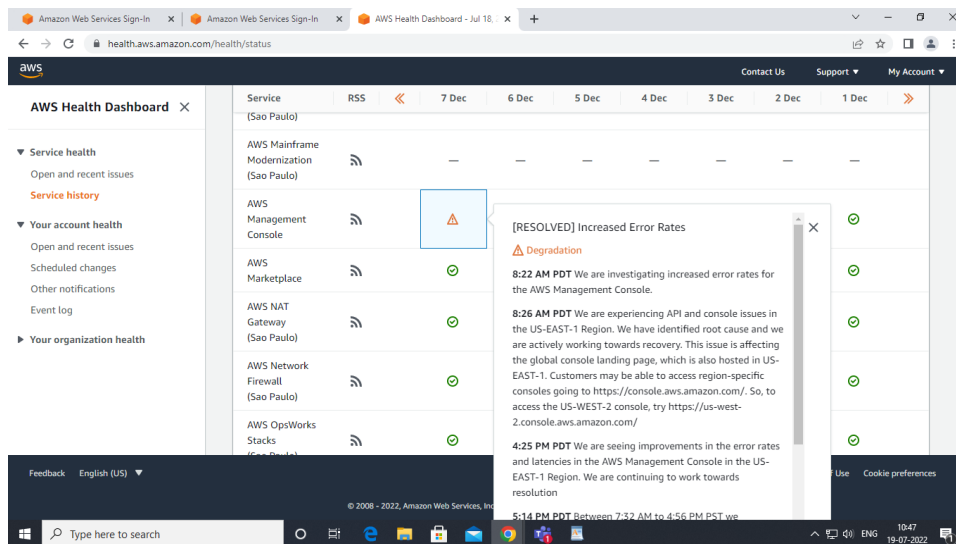

Service Degradation:-

8:22 AM PDT We are investigating increased error rates for the AWS Management Console.

8:26 AM PDT We are experiencing API and console issues in the US-EAST-1 Region. We have identified root cause and we are actively working towards recovery. This issue is affecting the global console landing page, which is also hosted in US-EAST-1

4:25 PM PDT We are seeing improvements in the error rates and latencies in the AWS Management Console in the US-EAST-1 Region. We are continuing to work towards resolution

5:14 PM PDT Between 7:32 AM to 4:56 PM PST we experienced increased error rates and latencies for the AWS Management Console in the US-EAST-1 Region. The issue has been resolved and the service is operating normally.

Informational

4:35 AM PDT We are investigating increased EC2 launch failures and networking connectivity issues for some instances in a single Availability Zone (USE1-AZ4) in the US-EAST-1 Region. Other Availability Zones within the US-EAST-1 Region are not affected by this issue.
